

BIRD REPELLENT LIQUID

Hawkx Eye[®] Bird Repellent Liquid is a new generation bird repellent based on *Methyl Anthranilate*. The formulation contains a very creative formulation package that enables repelling birds.

Methyl Anthranilate, the food grade, an active ingredient in Hawkx Eye[®] Bird Repellent Liquid, works by irritating the pain receptor associated with birds' senses of taste and smell without causing any harm to the bird.

By spraying repeatedly for 7-10 days, the birds recognize the grape odor and are repelled away from the area that was sprayed.

Directions for Use

Hawkx Eye[®] bird stop liquid creates an invisible barrier that irritates birds' trigeminal systems (similar to our sense of smell), for a harmless but potent effect. Directly apply to surfaces by painting or spraying Hawkx Eye[®] bird stop liquid to repel birds from feeding, loitering, and landing. Great inexpensive, proven solution. Shake well before use.

- **Reduce damage to crops and increase harvest revenues**
- **Save parks, yards, corporate grounds, fields, ponds, turf, etc. from bird damage**
- **Protect landscaping and property from corrosive droppings**
- **Reduce health and liability risks associated with pest bird infestation**
- **Prevent the spread of diseases, such as West Nile, Salmonella and E. Coli**
- **Eco- friendly**
