

Owl Decoy

Scare away birds and small pests with this predator replica of the most-feared aerial predator, the Great Horned Owl, which catches and eats nearly everything in its path. Without movement, an owl scare is useless – don't be fooled by imitations that are immobile! The owl head is made of a hard plastic resin, and the body/wings are extra-durable, waterproof non-woven fabric supported by flexible cables and riveted plastic struts. The Owl provides coverage of upto 6000 sq. ft.

Benefits

- Cut down on cleanup and repair costs
- Protect buildings, equipment, and vehicles from corrosive bird droppings
- Reduce health and liability risks associated with pest bird infestation
- Prevent the spread of diseases, such as West Nile, Salmonella and E. Coli
- Eliminate fire hazards caused by birds building nests in vents and chimneys
